Affiliated with CBSE | Affiliation number: 430637

A Message from the Founder's Desk

Dear All,

We understand that choosing the right school for your child is one of the most significant decisions you'll make. As parents, you naturally ask:

- What is the most important thing a school should teach?
- How is SSI different from conventional schools?
- Is my child truly safe here?
- Will my child be emotionally resilient and academically prepared for the competitive world ahead?

These are more than just studies; they represent every parent's deepest concerns. In our tireless efforts to address these critical concerns, we discovered that even in world class facilities catering to academic excellence, there are still some gaps. Even the best institutions, with their incredible facilities and top-tier academics, had these empty spaces. Something essential was absent. So what was it? After years of tedious, comprehensive study, we discovered that this emptiness was caused by a sense of balance.

A balance between:

- Thought and action
- Physical strength and emotional resilience
- Intelligence and compassion as observed in nature's wisdom

Education is not just
preparation for life-it is life
itself, in **Balance**

A Message from the Principal's Desk

Dear All,

Welcome to Shree Shakti School of Innovation.

Here, learning is a journey, not a destination. We nurture minds, hearts and characters by creating a space where every child feels seen, supported and inspired.

Our approach blends academic excellence with creativity, innovation and values. Through technology, arts, nature and service, we equip students with the skills, empathy and resilience to thrive in a challenging world.

We work with families to cultivate curious, confident and compassionate learners. Every child is unique and we aim to foster curiosity, critical thinking and resilience in a joyful and inclusive environment.

As principal, I am proud to lead a passionate team dedicated to care and innovation. Together, we are building a vibrant learning community where imagination meets purpose and education becomes a lifelong adventure.

Shree Subrata Chatterjee

Principal,

Shree Shakti School of Innovation

- M.Tech from IIT Kanpur
- Fellowship from State University of Buffalo, USA
- Teaching and Learning expert in national and international curriculum

OUR VISION

Nurturing leadership for sustainability through innovative practices rooted in nature

OUR MISSION

To provide a rich, dynamic learning environment grounded in the philosophy of Panch Kosha and the principle of balance, with a campus that itself is a teaching tool, guided by world-class educators and diverse learning resources

OUR MOTTO

ASPIRE - ACQUIRE - ACHIEVE

We aim to:

- Develop students as vibrant and integral members of the community
- Provide a strong foundational knowledge for a future world and upcoming career options
- Provide support for emotional, social, spiritual and psychological growth
- Cater to individual needs through personalized attention
- “Each Child Matters”: promoting inclusiveness to establish equitable learning opportunity
- Equip students to be valuable contributors to the society

Educational Programs in SSI

The learning journey starts as a beginner and is concluded as an innovator.

“Beginner” to “Innovator”

Beginner Program: for 3.5 to 8 years of age

As beginners students develop their understanding of the world majorly through their sensory organs. They sing, dance, hop and play. They start caring for themselves and their peers. Moreover, they start wondering, looking at the blue sky and the flying birds. They see the butterflies and they get mesmerized. They listen to stories and start developing their understanding on **how to react and respond**.

Explorer Program: for 8 to 11 years of age

The Explorer program is a phase where students are encouraged to ask relevant questions, mostly starting with “What” and “Why”. They explore the environment, the beauty of nature, the daily phenomenon and become curious to know “Why”. The questions could be rudimentary but reflect their quest to know. Our teachers are careful enough to nurture and align their thought processes so that they develop their scientific temperament and logical reasoning by asking more questions.

Investigator Program: for 11 to 14 years of age

As **investigators**, students gradually develop the understanding of the science behind the observed phenomena. This program enables them to investigate on "How". Their quest gets clarification by the careful explanation of the teachers and by the projects they build in groups. Students are encouraged to build working models and analytical reports of their investigations.

Our assessment of the investigator program is based on the exemplification of the competencies need to be attained by the students. We have designed the program to get rid of memory based learning and to promote more hands on activities.

Learning in this program is more self propelled and driven by investigation.

Innovator Program: for 14 to 18 years of age

As innovators, students are encouraged to ideate and get engaged in prototyping. By the time they reach to the phase of innovator, they develop a **fair understanding** of the societal scenario and become enthusiastic to solve problems the society is suffering from. Innovator's class rooms are driven by the pedagogy of "research based pedagogic tools". The class starts with a relevant problem statement and the subject specific concepts help to find the solution of the problem statement leading to ideation and prototyping.

Gradually the challenges they get, ascend in the level of difficulty. They decode certain global problems of economics, engineering, space science, technology etc. by the able guidance of their mentors. Most of the innovators get ready to take part in major global innovation challenges and demonstrate their design solutions.

This program is curated by a dedicated and qualified research team. It is a great educational initiative for the young learners to enter to Universities of global repute and be ready for future.

Is a camera lens
more powerful than
the human eye?

A school that promotes **curiosity and questioning**

Do the animals
have their language of
communication?

Why can't
I fly like birds?

If God created us,
then who created God?

Health & Physical Education

Fitness. Well-Being. Holistic Growth.

At SSI Ambaji, Health and Physical Education aims to strengthen the body, sharpen the mind and promote emotional balance. Through structured sports, fitness routines, mindfulness practices and nature-based activities, every child develops lifelong habits of health and discipline. Our 6,800 sq. m sports arena, guided by national-level coaches, further empowers students to be trained and compete.

- Daily fitness and yoga
- Sports and skill development
- Outdoor adventure activities
- Health and wellness monitoring
- Holistic life skills

क्रीडा संगम

Building a Strong Foundation for Life

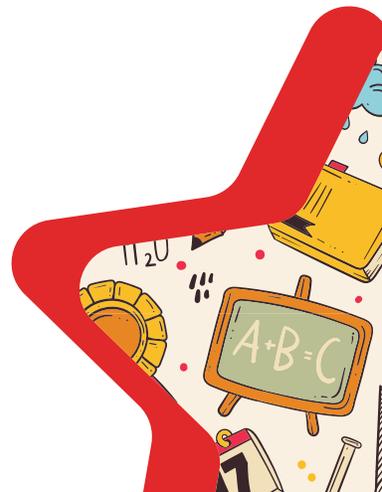

Our approach ensures that every child grows healthier, happier and more confident-ready to excel in academics, sports and life.

At SSI, every **Beginner** learns through touch, feel and care, nurturing sustainability and coexistence

Pancha Kosha

(Holistic Development at SSI)

At SSI, education is not just about academics—it is about nurturing the child holistically. Guided by the philosophy of Pancha Kosha, we prepare students to balance body, mind, heart, wisdom and spirit.

I. Physical Development

We nurture strength and agility, endurance and cardio-vascular capacity by practicing age specific health and physical education activities.

- Sports and fitness
- Awareness about inner strength
- Healthy habits

2. Mental Development

We stimulate curiosity and reasoning skills through creativity and problem solving.

- Critical thinking
- Boosting collaboration
- Imbibing academic rigor

3. Psychological Development

We help children understand emotions, build empathy and strengthen social skills.

- Emotional awareness
- Empathy in action
- Social skills

4. Cognitive Development

We encourage deeper intuition, self-awareness and higher-order thinking.

- Lateral thinking
- Intuitive thinking
- Practicing mindfulness

5. Spiritual Development

We nurture values, inner strength and connection to self and the universe.

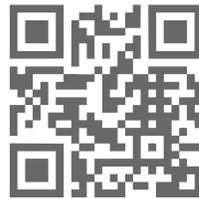

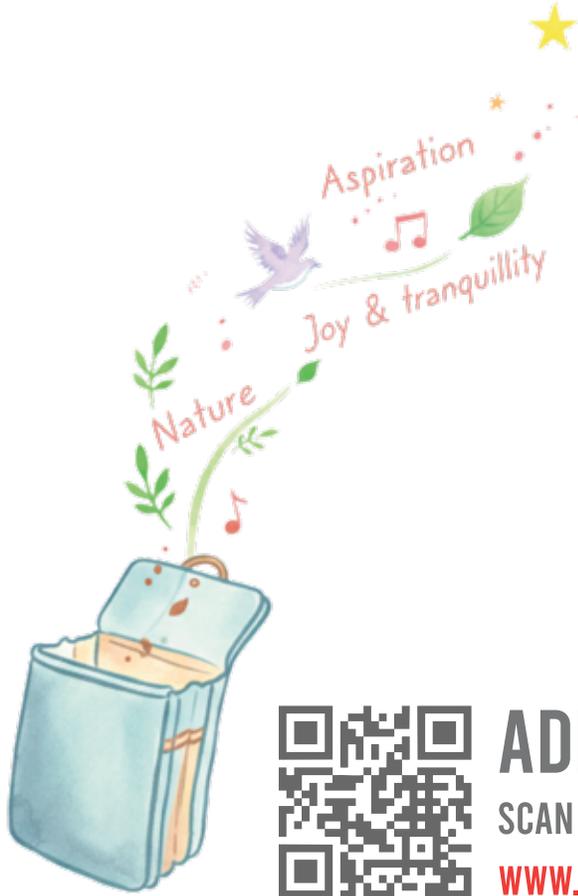

- Value education
- Being connected with deep rooted culture
- Inner growth
